RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES FYE JUNE 30, 2016

Net change in fund balances - total governmental funds	\$ (135,484)
Amounts reported for governmental activities in the statement of activities are different due to:	
Governmental funds report capital outlays as expenditures. However, in the statement of net assets, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. The effect on net assets is the amount by which capital outlays exceed depreciation in the current period. Depreciation expense Capital outlays	(4,707,388) 3,289,020
Certain receivables will be collected this year but are not available soon enough to pay for the current period's expenditures. This is the amount by which such receivables increased (decreased). Property taxes receivable Operating Grants and Contributions	85,623 255,463
Other miscellaneous conversion adjustments	-
A portion of the change in fund balances is the proceeds from the general obligation bonds issued during fiscal year 2014. those proceeds are not considered revenue items for the purpose of this statement.	(2,906,518)
The repayment of the principal of long-term debt (e.g., bonds, leases) consumes the current financial resources of governmental funds. However, such repayment has no effect on net assets.	1,526,017
Differences in the cost and accumulated depreciation on disposed capital assets are reported as a loss and reduction in net assets in the statement of activities. Cost of assets disposed Accumulated depreciation of assets disposed	- -
Compensated absences are reported as liabilities in the statement of net assets, but are only reported in government funds to the extent they have matured. This is the amount by which compensated absences (increased)/decreased.	
Accrued vacation payable	(32,506)
Interest on long-term debt in the statement of activities differs from the amount reported in the governmental funds because interest is recognized as an expenditure in the funds when it is due, and thus requires the use of current financial resources. In the statement of activities, however, interest expense is recognized as the interest accrues, regardless of when it is due.	9,267
Governmental funds report district pension contributions as expenditures. However, in the Statement of Activities, the cost of pension benefits earned net of employee contributions is reported as pension expense District pension contributions	-
Cost of benefits earned net of employee contributions	-
Change in net assets of governmental activities	\$ (2,616,506)

The financial statement values presented do not include balances and disclosures related to current year defined benefit pension plan activity as required to be reported under Governmental Accounting Standards Board (GASB) Statement Number 68 because the required data was not readily available. However, beginning GASB 68 balances related to the defined benefit pension plan have been included. The final audited financial statement values will be updated to reflect full GAAP reporting of GASB Statement No. 68 balances.

The notes are an integral part of the financial statements; however, to conserve space, they are not included in the publication but are available for review at the board office.
