

NOTICE TO CUSTOMERS

Appalachian Power plans to maintain a portion of its power line rights of way in West Virginia through aerial application of registered herbicides. Weather permitting, the program will begin on or about June 1, 2020.

Questions about the program or information about sensitive areas near the power lines listed below, such as springs, wells, streams, lakes, ponds, orchards, crop areas, gardens, pastures, meadows, year-round dwellings, public recreation areas, and Christmas tree farms, may be directed to the company by calling toll-free **1-800-642-3622**.

Right-of-way maintenance agreements between the company and landowners are available to those preferring to accept responsibility for clearing the right of way crossing their property in lieu of aerial herbicide applications. Such agreements provide for compensation equivalent to the cost of aerial herbicide maintenance, provided the work meets the company's specifications.

Landowners desiring to enter into right-of-way maintenance agreements with Appalachian Power should call the toll-free number above, or contact the nearest office as listed below. Maps showing the location of rights of way to be maintained in their areas also are available for inspection at these offices.

Herbicides to be used have been extensively tested and are registered by the U.S. Environmental Protection Agency and the West Virginia Department of Agriculture. They are glyphosate, imazapyr, metsulfuron methyl, fosamine, triclopyr, aminocyclopyrachlor and aminopyralid. All applications are performed by certified applicators.

Rights of way involved in the program are:

LINCOLN COUNTY

Culloden-Wyoming 765 kV – A transmission line on steel structures beginning at the Culloden Station along James River Turnpike near Culloden and running south, passing the midpoints of Griffithsville, Yawkey, Woodville, Turtle Creek and Jeffrey and ending at a point along Mountain Laurel Drive near Hewitt.

Darrah-Sheridan 69 kV – A transmission line on wood poles beginning at the Darrah Station near Nickel Plate Road in Huntington and running east-southeast, crossing the midpoints of Salt Rock and West Hamlin and ending at the Sheridan Station along McClellan Highway near Branchland.

Midkiff-West Huntington 138 kV – A transmission line on wood poles and steel structures beginning at the West Huntington Station on Jackson Avenue in Huntington and running south, passing the midpoints of Shoals, Lavalette and Crockett and ending at the Midkiff Station on Ten Mile Creek Road near Branchland.

Complaints about possible damage resulting from herbicides may be made by contacting the company at the above toll-free number or the local office listed below. Complaints may also be directed to the Department of Agriculture, Pesticide Regulatory Programs Unit, which may be contacted in Charleston at 304-558-2209.
